

Abstract of the Disclosure

[00159] An electronic system and method of pervasive output allow an information apparatus to output digital content conveniently to virtually any output device. An output controller is installed in or connected to an output device, such as a printer, to enable the output device to communicate and negotiate services with an information apparatus such as mobile computing device. The information apparatus may communicate with the output controller to obtain device dependent data or software components such as device specific printer driver.

1. The first part of the document is a list of names and addresses, which appears to be a directory or a list of contacts. The names are written in a stylized, cursive font, and the addresses are written in a more formal, printed font. The list includes names such as "John Doe", "Jane Smith", and "Robert Johnson", along with their respective addresses.
